## About This Game

Family-friendly PC tower defense game. You'll lead the resistance of plants, which are being captured by aliens from exhausted starving planet.

Place towers and build barricades, freeze, teleport and blow them up - but don't let them enslave You!

- **well thought out balance** - each tower and spell are unique, there is no universal weapon!
- **a new mechanic** - you not only build the towers, but also clear the territory for their construction. And also grow and protect resource-giving plants!
- **various map modifications** that significantly affect the gameplay!
- **random enemy routes at the forks** - the game is never the same experience twice!
- **control over the towers** - you can directly set the target for all towers!
- **20 handcrafted levels** (and we are planning even more!);
- **high replayability** - pass levels, get achievements and perform special missions!
- **bright, juicy graphics**;
- **no cruelty and violence** - play with the whole family!

Stay on Your toes as Your fight with armoured knights and heavy-footed giants, impregnable wizards and skilful Gunners, battle bees and even flying saucers full of aliens!

Hit, burn, freeze and bewitch the invaders with 5 unique towers: Boxer, Mage, Stone-thrower, Chili and Freezer. Buy power-ups in the game shop to specialize Your defenses and fortify even more!

Support Your defenses with four spells that often are real life-savers! Build barricades to block enemies' routes, blow 'em up and teleport! And grow the field of sun-giving plants necessary for Your upgrades!

The game is currently in progress. Now we are working on:

- improving our graphics and visual effects;
- adding more content (upgrades and powerups to bring more strategical variety; new levels, modes and achievements for higher replayability).

### Poker Variants

There are many variant styles of poker. We have focused on the seven variants that are most commonly played in casinos. These are:

- Five Card Draw
- Five Card Stud
- Seven Card Stud
- Three Card Monte
- Omaha/Hold'em
- Texas Hold'em

On top of this there are several different ways in which the winner is resolved. These include:

- High / Low - The person who has the highest hand wins half the pot and the person with the lowest hand wins the other half. In some variants one player may be able to win both of these. (eg in a seven card draw)
- Lowball - Lowest hand wins.

Further there are two primary ways in which the betting is initiated before each hand. These include:

- Ante - Each player pays a preset amount before the actual deal into the pot.
- Blind - Two players pay an amount (usually preset) into the pot before the actual deal. The larger of these becomes the previous bet (for betting limit purposes) and the smaller of these becomes the previous pot (for betting limit purposes). The two players selected alternate between rounds.

Also, the way in which betting is limited also varies. In our game we have three variations on betting, which are:

- Pot Limit - The limit is equal to the total in the pot, after bringing in enough money to call. Eg if the stake is 40 and there is 200 in the pot, and your current personal stake is 40 then the max limit is 200 + (40-40) or 240.
- Half-Pot Limit - The limit is equal to "half" the total in the pot after bringing in enough money to call.
- Limit - The limit is a set amount.

Whatever limit is chosen, the one rule that applies to all is that the "maximum" raise is equal to the largest previous raise for this hand.
